We also provide free
installation and home wireless
network setup.*

Dear Friends,

With each rollout of new technology we are able to do things that often become indispensable to us. A flood of new services are flowing your way because of the new 4G (4th generation) internet data speeds that are coming on the market.

Most of you use your computers to access the immensity of internet content. We all want affordable, enhanced, and fast internet connection. And CLEAR does just that.

Contact me and I'll share with you the many reasons how CLEAR is different. My customers tell me they love the fact you can access CLEAR anywhere you go.

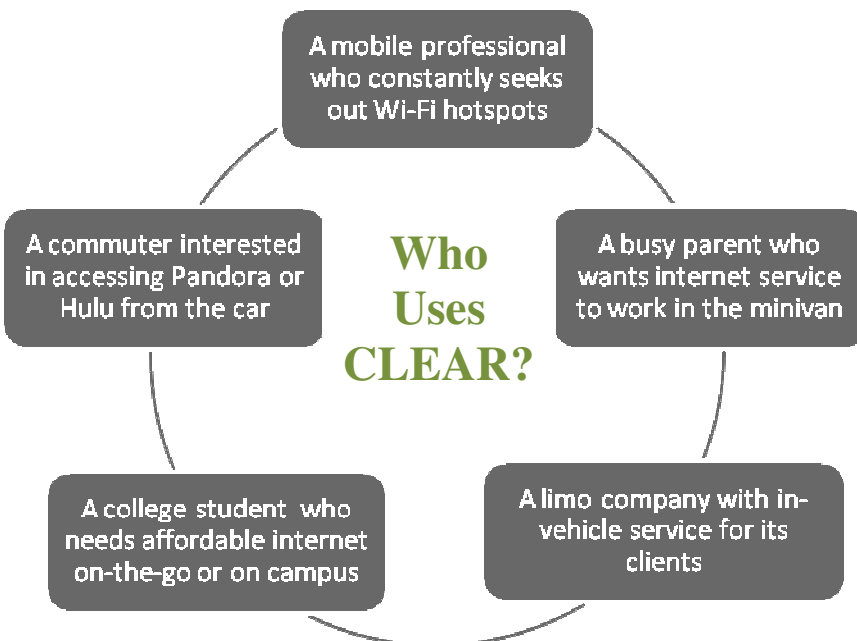

People who use CLEAR Internet range from the tech-savvy professional to the non-technical retiree. It's CLEAR this is a simple, reliable internet option.

P.S:

You will get an **EXCLUSIVE** Bonus Gift from me: The WordTipster, my "Cheat Sheet" of hidden shortcuts and techniques for Microsoft Word plus home personalized training. Use it yourself or give it to a family member.

FIVE Reasons My Clients Say CLEAR Internet is Better:

- 1. Incredible Speed**
The fastest modem in the nation.
- 2. Affordability**
Plans start at \$20/month.
- 3. Convenience**
Get wireless internet access in your house, car, everywhere!
- 4. Ease of Setup**
We send you the equipment. You plug it in & get online. It's that easy.
- 5. It Uses the Latest Technology**
CLEAR is an industry leader and one of the highest-rated companies.

What.

Our network combines the mobility you love about your cell phone with the speed you want from broadband. So you can stream movies, TV, play online games and video chat on the go, at speeds as fast as CLEAR at home... Try doing that with the internet from the cell phone companies.

How It Works.

The CLEAR customer experience is similar to that provided by Wi-Fi, but without the short range limitations of a traditional hot spot. CLEAR uses a 4G technology that differs from Wi-Fi called WiMAX, which provides service areas measured in miles, not feet. Now, consumers and businesses can access the Internet wirelessly, at true broadband speeds at home, in the office, and on the go anywhere in the CLEAR coverage area.

Why Switch?

Unlike other wireless services, CLEAR delivers a mobile broadband internet experience on par with speeds typically experienced only on wired connections, like DSL.

The Technology Behind the Service

Unlike other wireless services, CLEAR delivers a mobile broadband internet experience on par with speeds typically experienced only on wired connections, like DSL. For example, some of today's 3G wireless networks typically deliver download speeds of between 1.0 and 1.7 Mbps. CLEAR customers, however, can expect to see download speeds of 3 to 6 mbps with bursts over 10 mbps.

The CLEAR WiMAX network is expected to deliver real-world data speeds in the 3Mbps to 6Mbps range, with burst data speeds reaching 10Mbps – speeds well in excess of the 2Mbps data rates now possible with 3G networks in the US.

Other CLEAR Services:

Clear Voice: Enjoy the benefits of CLEAR Voice for your home or business. Forward calls to multiple phones depending on the time of day, day of week and caller number, get voicemails sent to your email account in .WAV attachments, enjoy unlimited long distance and more. Like Vonage!

Clear Spot: With the Clear Spot, any existing, off-the-shelf Wi-Fi device (compatible with 802.11b/g) can connect to CLEAR's mobile WiMAX network. The Clear Spot creates a personal Wi-Fi hotspot that travels with consumers anywhere they happen to be within CLEAR's mobile WiMAX service area. This \$139.99 device is a portable, battery-powered router that seamlessly connects up to eight standard Wi-Fi-enabled devices (computers, mobile phones, portable gaming, consoles, cameras, etc.) to the internet via a Clear USB modem to access CLEAR's mobile WiMAX network. The Clear Spot is compatible with both the Clear 4G and Clear 4G+ mobile USB dual-mode service options.
